What steps can young people take to help to protect the wildlife?

What a good question, teacher! There is a lot of possibilities to save it. For example, green energy! I think all the people heard about this technologies. Hydro, wind and sun electrastations. The first type is the most popular for now. It doesn't need much money to build, produces a medium amount of energy and can be built on the almost every river. Same with sun electrastations, but their place is a flat landscape. Aero electrastations is the most effective type, but it costs too many cash, so nobody except Japan uses them.

For the second, people can place more trashcans on the street, so trash won't be dropped on the land. But people still drop it not on the streets, but oceans and forests, aren't they? So countries should produce more ships to clear the water and take all the bottles, food boxes and other after picnic with them.

For the third, human could buy electric cars. They do not destroy atmosphere so fast, like default cars make it. Also wildlife is subdued by poachers, illegal hunters and fishermen. They're killing animals everywhere and anytime. It's cruel! But I'm happy that governments already fights with their activities.

Jan Koum was born in 1976 in Kiev, Ukraine. His family was poor and their house didn't have hot water or electricity. When Koum was 14, he and his mother went to live in California, U.S. Life was hard and they didn't always have money for food. Koum worked in a store to earn money, but he also studied computer science from books. He went to San Jose University, but he didn't finish his studies.

In 1997, Koum found a job with the IT company Yahoo! and met Brian Acton. Koum and Acton worked together for nine years and became friends. In 2007, they left Yahoo! and moved to South America. When they returned to California, Koum and Acton applied for jobs at Facebook, but didn't get them. In 2009, Koum bought a smartphone and used apps for the first time. This gave him an idea. As Koum's and Acton knew they had a good idea, so they didn't give up. And they were right. In 2015, they sold WhatsApp for \$19 billion.

e) "Do young people today make good use of their time?"

Comments

Making good use of free time is an important part of the day, but that days will make your life better. Because if you won't do anything useful for yourself, you can't get any good results in study, works, etc. So how do young people use their free time nowadays?

Firstly, 21st century is technologies' time. Almost every teenager use smartphone and social medias. They even can be too addictive. In my opinion young people waste a lot of time using internet and don't use their free time right.

Secondly, teenagers who have addiction to social networks, doesn't have a willing to do something else. They may not have a hobby and do not anything useful for themselves.

On the other hand, there are many young people that do a lot of interesting things or have good hobbies. For example, some of them study in their free time, do sports, learn something new or help to other people.

Nowadays, teenagers have really good opportunities to spend time very well.

In addition, I would like to say that every person spend their free time differently. Especially nowadays we live in time when people have many variety of activities.

In conclusion, today young people can make good use of their free time, of course not everyone spend their time productively, but they can make decision to do it or not.

E) An internal student website is investigating the question "Do young people today make good use of their free time?" Write a short article for the website expressing your opinion about the topic.

Comments

Nowadays, many people think that teenagers do not make good use of their free time. But I do not agree with that point of view. In my mind, young people spend their free time very usefully.

To begin with, everybody knows that we live in 21st century, in era of science and development. Young people know how to use technologies for their benefit. For instance, teenagers always study and learn new things online: who is fond of learning languages uses apps like Duolingo, who loves music or art, listens to it at Music apps and can learn playing guitar or piano by watching videos, who likes computers and math can start course of programming, who loves reading, read books online, have discussion chat online. All in all, everybody spend time with pleasure.

Moreover, with the development of the world, young people are very advanced, that people for example 20 years ago, more and more people do not spend their time to unnecessary things, and develop their skills of everything what is possible. For example, teenagers know how to make money in free time. Also, many young people have their own business.

On the other hand, as I said before, 21st century is century of technologies, so some teens do not know how to use free time, and spend it playing

on computers or telephones. That is an the cause of health problems. It is connected with big impact on us's and organism.

Considering all the above I can say that advantages overweigh disadvantages and young people today make good use of their free time.

Topic F

Do young people today make good use of their free time?

As we can know, in 21st century, we spend a lot of time in our mobile phones. It affects at our lives including free time. Recently, I asked my friend Alex about her free time. Answer was not what I expected. She said her free time is not different from other time. She just spends it by scrolling news in social networks or watch meaningless videos. This made me questioning about other people's free time spending.

A lot of people of ~~old ages~~ all ages started to forget how to use time right. We always have something to do, so free time is a breath of fresh air. People should spend it on holidays with family, friends and lovers instead of sitting on couch and doing nothing. Smartphones are always with us, unlikely our dear people. People don't have a lot of time because life is short. Does your life worth being ~~spended~~ wasted by yourself or you can do something more important to yourself?

Our university have a lot of talented and smart students, so this article should help them to find better way of using time. Time should be used to do nothing, but a developing your knowledge or talents. So choice is yours, what do you gonna do with your time?

E.
 Do young people today make good use of their free time?
 Today many people think that internet waste our time.
 But others don't. Now young people try to be modern,
 outgoing and interesting person. They spend their time
 in company of their friends, read articles about life style,
 do sport and try to developa their skills.

Firstly young people have many hobbies. Teenagers
 go to different events, such drawing, dancing, or music
 clubs. They developa their selves in such events. Secondly,
 they spend their free time in internet. They do different
 video on tiktok, youtube or Instagram. It helps them to
 communicate with people from other countries.
 Some young people have lack of time due to the
 fact that they study at school. But they spend their time
 to know something new about subjects and find information
 in internet.

I am sure that young people use their free time
 for useful abilities. People know that they developa
 skills for their future and try not to waste their time.
 Good use of the free time is key to success.

She locked the door and went to her car. She nearly dropped her car keys in result of trying to open the door with shaky hands. Everything was blurry because she was keeping hot tears in eyes from falling down her cheeks. She sniffed and took a deep breath desperately trying to calm down abnormally beating heart in her chest.

With numb fingers she finally managed to open the door and climbed into the car taking another shaky breath. "She was going to be alright," she said to herself, closing wet eyes. "It's okay. Everything is going to be just fine," she repeated and felt nails digging in flesh of her palms. In darkness of eyelids appeared figures of bright yellow court and ball, slamming hard to the floor on the other side of the net. She landed hard on the floor from a jump and everything got dark again. She felt spiking pain in her right knee, spreading along whole length of her leg. She immediately opened her eyes, clatching on a white brace placed on top of her sore knee. She felt noisius and something stinged in her chest, forcing her to seek for air again and again. Breath in and breath out. Every breath was freezing and that cold spreaded deeper and deeper in her body. She needs to call him or to text. Doesn't matter, she just needs him. Clipping pockets of her jeans, she realized that she had forgot the phone in doctor's cabinet. Biting her lips hard, she learned to rest her head on the wheel. Years of training, years of losing, years in self doubt came to this. She already knows what he will tell her: "I told you to be careful, to not overwork yourself. But have you ever listened?" He won't judge. Always near when she needs him. If hearing car is not true enough, then formal our voice to body is. But damage is done and nothing matters anymore. She feels empty.
